## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakashima et al ('976).

The reference discloses a fuel system having the claimed elements, including a fuel rail and a fuel distribution line (3) having one end connected to the fuel feed pipe (6) and the other end divided in plural branches respectively connected to different parts of the fuel rail. See Figure 1.

### ***Allowable Subject Matter***

Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the prior art showing various fuel system arrangements for fuel rail pressure pulsation damping.
